

TIGER CLAY SPERSE

Clay Dispersant

Description

Tiger Clay Sperse is a liquid clay dispersant which will effectively disperse sticky clays that causes bit balling particularly in HDD drilling.

Applications

Tiger Sperse will break down sticky clays which in turn will reduce bit balling and excessive viscosity build up's with the fluid.

Advantages

- Effective in small concentrations
- Easy to mix
- Reduces stickiness of clays
- Keeps drill bit clean
- Environmentally friendly.
- Can be added directly into system.

Recommended Treatments

Tiger Clay Sperse can be poured into the mud system.

- In fresh water – 4 to 10 litres/m³
- In salt water – 6 to 12 litres/m³

Packaging

Tiger Clay Sperse comes in 25 litre drums.
